Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the recitation "The invention relates to..." is improper for US patent practice. Correction is required. See MPEP § 608.01(b).

Claim Objections

Claim 1-4 are objected to because of the following informalities: Claims 1-4 are method claims but use passive voice which makes the method steps ambiguous and hard to follow. Additionally, the recitation in all claims, "especially airbag fabrics woven in one piece", leads to some ambiguity because it is not clear if the applicant is claiming the invention as a one piece airbag or a multiply fabric. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Art Unit: 3765

Claims 2 and 4 recite, "a rep mix" and "a plain weave L 1/1"; neither of these items has a clear meaning in the art and neither are defined in the disclosure.

In claims 3 and 4, the recitation, "...comprising the differing yarn materials and/or material finenesses.....are divided into another number of plies.", is a run-on sentence fragment that has no clear meaning.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, to the extent that they are understood by the Examiner are rejected under 35 U.S.C. 102(b) as being anticipated by Sollars, Jr. '309.

Sollars discloses, "An all-woven inflatable fabric having areas of two layers and attachment points or "seams" where single layers of fabric are formed. Such single fabric layers are constructed solely through the utilization of basket weave patterns. These specific single fabric layers provide a relatively effective manner of reducing air permeability within the entire fabric article by decreasing the possibility of yarn shifting upon inflation of the inflatable fabric (abstract)."

The figures show the weave design of the fabric, wherein the double layer areas are not woven in a plain weave as recited by the instant claims.

All other limitations of the instant invention as originally submitted are not understood by the examiner and as such fall in with the instant rejection.

Art Unit: 3765

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Airbag fabrics have been cited.
